

Exploiting Earth Observations to benefit Society

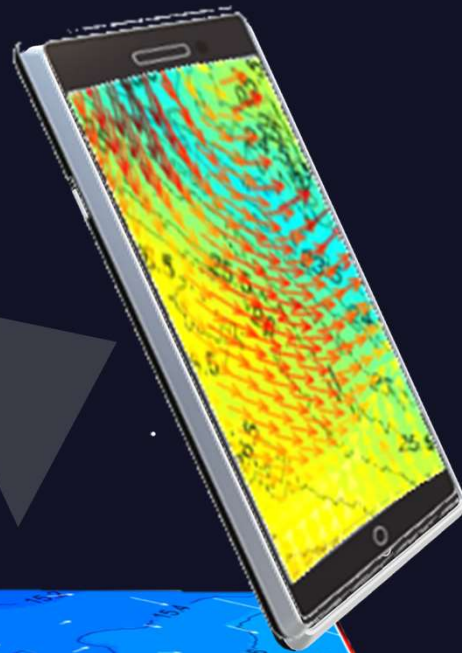

STREAM project connecting space data to society

www.stream-srf.com

STREAM is an MCST Space Research Fund project intended to provide on demand satellite earth observations to users via dedicated downstream services easily accessible over smartphones and tablets, in user-friendly formats. The project is launching a prototype digital platform with state of the art data and information tailored-made to serve local stakeholders, operators, economic endeavors and general users to optimize, empower and enhance their activities, operations and products.

Innovation in STREAM
Zoom, select and get
satellite data where and
when you need

Project led by the Malta College of Arts, Science & Technology
Project Partners

Project Leader: Prof. Aldo Drago
